INVENTORY OF
TREASURY FUND ACCOUNTS

DEPARTMENT OF ADMINISTRATION
BUDGET DIVISION
FEBRUARY 10, 1970

INTRODUCTION (Continued)

Each of the eight special funds consists of accounts or sub-funds, most of which are directly associated with a single administering agency. The General Fund, on the other hand, is not broken down into accounts, and for this reason, it is not considered in this inventory. However, additional information concerning monies in the General Fund may be obtained by reference to the publication of the Budget Division entitled Report of General Fund Revenue Sources dated October 22, 1969.

The Inventory of Treasury Fund Accounts is presented in eight sections, with one section devoted to each of the special funds and to the accounts contained therein. Information provided relative to each account includes the sources of revenue, the purpose or use of such revenues, and any pertinent remarks. Also provided is data relative to the administering agency, the date of origin, the creating authority, and the recent appropriation history, where applicable. It should be noted that the date and authority shown refer to the account itself and not to the activities or programs to which it relates. Included, at the beginning of the report, is a schedule of accounts by fund, which also serves as an index, and a listing of accounts by administering agency.

The Budget Division would like to express its appreciation to the personnel in the control agencies, and in the line agencies, whose excellent help and cooperation made completion of this inventory possible. Any recommendations for future improvement of the report are solicited.

A presentation of Budget Division recommendations, concerning areas other than closing of defunct accounts, has been made to the State Controller in a separate document.
